The Battery Level status of your phone is displayed on the instrument cluster screen.

VEHICLE TO MOBILE

MAINTENANCE RECOMMENDATION

This app sends maintenance recommendations to the bike owner. For example it recommends the right time for oil change and keeps tabs on battery status and indicates either with a "Good" or "Check" notification.

FUEL CONSUMPTION

This feature helps riders track their daily and monthly fuel consumption.

LAST PARKING POSITION

The last parking feature of the app gives you information about where you last parked your bike.

*The machine cannot be tracked via this function if it's moved since it was parked.

MALFUNCTION

Should the machine suffer a breakdown or malfunction, the App indicates so on the smartphone. It can be verified on the phone as part of the bike's records. It also sends out information about when the malfunction occurred and the machine's location to a designated 3rd party (Like dealer or family member) via e-mail.

REVS DASHBOARD

The smartphone screen can also function as the Revs Dashboard, that displays data that is not available on the bike's instrument cluster, such as 1) Engine RPM, 2) Degree of throttle opening, 3) Rate of Acceleration, 4) Eco-friendly riding indicator and 5) Real-time Fuel Consumption.

RANKING

This App connects with other Yamaha Riders App and maintains a ranking of the riders in terms of distance travelled and how eco-friendly their riding has been.

LCD METER

The sleek and stylish LCD instrument screen is a mix of both, traditional and modern design. The tachometer display in it has an analogue look that shows the revs in a circular pattern. This display also shows smartphone notifications accurately and attractively.

POWER SOCKET

The power socket provides a convenient charging slot for mobile phones and other personal devices.
